Remote Pair Button for RU-BTLA

- Remote Control of RU-BTLA Bluetooth Audio Receiver
- Intuitive Single Button Pairing with LED Status Indication
- 45 mm European-Style Wall-Mounted Remote Control
- Fits 60 mm Deep European Electrical Box Using Included Adapter Plate
- Single-Button Operation for Pairing and Disconnecting
- Wired Using 3-Conductor Single-Pair Shielded or Twisted-Pair Cable
- Powered From the RU-BTLA
- LED Indicator for Pairing Status
- Two EU-RBTPs May Control One RU-BTLA
- Supplied With White Cover Plate

APPLICATION: The EU-RBTP is a European-style wall-mounted pushbutton remote control for use with an RU-BTLA Bluetooth® Audio Receiver. The EU-RBTP provides convenient status indication, pairing and disconnect control of the associated RU-BTLA.

The front-panel push button is pressed and held until the blue LED flashes, indicating the associated RU-BTLA is available for pairing. The blue LED indicator glows steadily while paired and then dims 20 seconds later. A paired device may be manually disconnected by momentarily pressing the EU-RBTP button.

The EU-RBTP connects directly to the RU-BTLA using a 3-conductor single-pair shielded or a standard twisted-pair cable. One or two EU-RBTP pushbutton remotes may be used to control a single RU-BTLA. Each EU-RBTP is powered from the RU-BTLA.

The 45 by 45 mm European-style design blends seamlessly into commercial and residential environments, making it ideal for conference rooms, classrooms, hospitality spaces, and presentation systems that require user-friendly Bluetooth access.

The EU-RBTP provides a simple and intuitive user interface for controlling RU-BTLA Bluetooth audio sources in professional installations. Designed to work with the RU-BTLA, this remote pushbutton allows users to initiate pairing and manage connections without accessing the equipment location while enabling the RU-BTLA to be placed in the most radio-advantageous location. Its European-style form factor ensures a clean, professional appearance, while its straightforward installation makes it a practical solution for system designers and installers.
